

Lighting Tools and Plugins

A collection of tools and plugins that are useful for lighting scenes.

There are several tools and plugins found within the engine that are useful for helping light environments, or providing visualization options for individual objects in a scene.

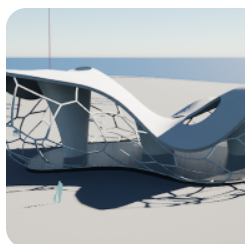

Explore the tools and plugins below to learn how they can benefit your workflows and projects.

Lighting Plugins

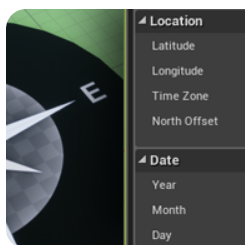

HDRI Backdrop Visualization Tool

A Blueprint tool to quickly set up product visualization using an HDR image projection with real-time lighting and shadowing.

Sun and Sky Actor

A tool that provides a time of day system that is geographically accurate for location, date, and time.

Geographically Accurate Sun Positioning Tool

A tool giving you fine control over the Sun's geographic location based on latitude, longitude, date, and time.
