# Add a Surface Type

Add a Surface Type in Unreal Engine

The following steps detail how to add a **Physical Surface Type** to your project.

1. In the main menu, click on **Edit → Project Settings... → Physics → Physical Surface Category**.
2. Change the **None** in the **Name** field next to a **SurfaceType#** to a name descriptive of what you'd like the Surface Type to represent (concrete, flesh, wood, and so on).
